WHITEPAPER

METAV LAUNCHPAD

TABLE OF ——
CONTENTS

Abstract

The metaverse industry is on an unprecedented track of growth. With the blockchain, crypto, NFT, and GameFi industries coming to the mainstream, it is touted as the future of the internet. Metaverse will be the next big thing in social technology. However, the involvement of centralized tech giants in the metaverse is as concerning as it is exciting. MetavLaunchpad aims to change this. By bringing retail crypto investors to the picture, MetavLaunchpad nurtures the decentralized growth of the industry.

Powering Blockchain with Metaverse Artificial Intelligence (AI) Superpower

MetavLaunchpad is a cutting-edge platform that offers a range of innovative features and tools to its users. In our commitment to constantly improve and evolve the platform, we have decided to integrate AI technology into MetavLaunchpad to bring numerous benefits and new features to the platform.

Improved project selection and analysis: AI algorithms can analyze projects' viability, potential, and growth prospects, providing more accurate and in-depth insights to the MetavLaunchpad team for better project selection.

Enhanced security and fraud detection: AI-powered security systems can detect and prevent fraudulent activities on the platform, ensuring the safety of all users' funds and information.

Predictive trading and market analysis: AI algorithms can analyze market trends and predict market movements, providing traders with valuable insights to make informed trading decisions.

Personalized user experience: AI algorithms can analyze user behavior and preferences, providing a personalized user experience, such as recommendations for new NFTs, games, or projects.

Automated token management: AI algorithms can automate token management processes, such as staking and rewards distribution, freeing up time and resources for the MetavLaunchpad team to focus on other important tasks.

By integrating AI technology, MetavLaunchpad can provide a more efficient, secure, and personalized platform for its users. The AI-powered features will streamline processes, improve decision-making, and enhance the overall user experience on the platform.

Our approach to the Metaverse with MetavLaunchpad

MetavLaunchpad will work at the crossroads of all of these technologies. Providing a platform where any promising Metaverse project may simply fund its development and bootstrap its community. Launchpad for Metaverse projects that aims to democratize access to the protocols, products, and services that will form the backbone for the next generation of the internet, allowing users to become among the earliest pioneers and trailblazers in this promising new landscape. The IDOs and IGOs on MetavLaunchpad highlights of the platform are diligent listing, rug proof mechanisms, fair token allocation, and instant withdrawal. MetavLaunchpad will be a safe and secure platform where projects and retail investors can contribute to mutual growth.

You can take part in the initiatives that will create the foundation and first Metaverse pioneers through MetavLaunchpad. The MVLP token can be compared to your key for being a part of the Metaverse community. By staking your tokens, you'll gain access to a higher tier and all the benefits that come with it, such as early access to token launches, generous staking rewards. Two of MetavLaunchpad's primary deflationary strategies are a fee on all token sales (sell orders) and early unstaking fees.

Introducing AI Powered MetavLaunchpad

Launchpad for Metaverse, Artificial Intelligence (AI), Projects: We focus on the most growing aspects of Metaverse Projects – IDO & Initial Game Offering (IGO).

Token Management: The MVLP token will be the source to empower multiple products presented to the community and to the general public on MetavLaunchpad platform. This includes and is not limited to the access to Projects sales offered to the community, Staking rewards, access to farming pools, access to Play to Earn Games and the most engaging of all Prediction games.

Marketplace: Provides a trading platform for digital items from successfully released games. It is essential to provide NFT owners as much liberty as feasible, as well as the choice to sell and realise real-world value from their holdings, for the NFT ecosystem to thrive.

DeFi Integration: Partnership with leading DeFi protocols to offer a wide range of DeFi services and experiences.
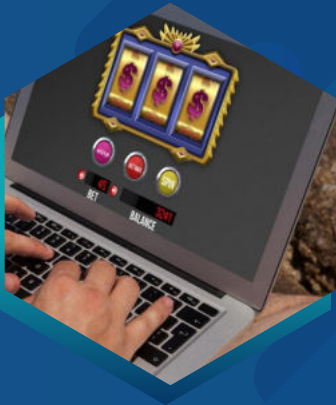

Prediction Games: Our platform also brings prediction games, which allow users to earn rewards by correctly predicting the outcome of events. These games are designed to engage users and make them more invested in the platform, while also providing them with the opportunity to earn rewards for their participation.

Rewards Program: Incentivizing users to participate and contribute to platform growth.

Native & Super Farming: On MetavLaunchpad, users can participate in farming to earn rewards by holding and staking MVLP tokens. The platform offers a range of farming opportunities, including native farming, where users can earn rewards directly from holding MVLP tokens, and super farming, where users can earn rewards by holding and staking other selected tokens in addition to MVLP tokens.

Play to Earn Games: Our platform will bring play to earn games which allow users to earn rewards while playing. These games are designed to incentivize users to continue playing and contributing to the growth of the platform.

Tiers

Different levels of rewards and benefits for holders based on the amount of MVLP tokens they hold.

3 Galaxy

Orbiter **4**

What MetavLaunchpad Provides?

High Quality Project:

Each project hosted on the platform will be hand-selected and vetted by the heavily experienced MetaVLaunchpad team, ensuring that only genuinely promising projects with real utility and long-term potential receive funding. The bar for entry will be high, enforcing a quality over quantity approach to selection.

Inevitable Growth:

Pre-Programmed token burn function upon early unstaking events to entertain healthy token price and volume.

Fair Allocation System:

No more gas wars. Our prorated system guarantees members access to deals and allocation sizing based strictly on how many MetavLaunchpad tokens you hold.

Cheap Transaction:

Launchpad built on layer 2 blockchain solution enabling number of transactions with immensely low gas fees.

Full Kyc Integration:

No more 24 hours wait for kyc approval. Kyc systems are very fast and need to be done only once to participate in any IDO.

Tiny initial market capitalization:

MetavLauchpad will launch with a tiny initial market capitalization of just $50,000 . This ensures that the market can move to a fair valuation while providing early stakeholders with an opportunity to obtain their tier at the best possible entry price.

Token Details

Token distribution is designed with a long term focus on Community and Ecosystem development. This will enable us to perform efficiently as a platform and to attract and encourage quality projects and infrastructure to be built on a long term basis.

07 Access to Airdrop Campaigns

Access to Native and Super farms **08**

Roadmap

Summary of our Roadmap: MetavLaunchpad Team will first deliver the MVP product by creating the most advanced smart contract, building a strong community, Incubation of Project then making the token live.

Q-1 2022
» Team Formation
» Concept
» Current Launchpad Assessment
» Market Research

Q-2 2022
» Social Media Presence
» Venture Partnerships
» Marketing

Q-3 2022
» Smart Contract Development
» Staking Mechanism and Rewards development
» Tiers Development
» Strategic Partnerships

Q-4 2022
» AI integration
» KYC Integration
» Website design
» Expanding MetavLaunchpad Community

Q-1 2023
» Website Launch V 1.0
» Airdrop Campaign
» Launchpad MVP Launch
» Seed Sale

Q-2 2023
» Private Sale
» Launchpad Partnerships
» Marketing Boost
» Public Sale

Q-3 2023
» Listing Partnerships
» MetavLaunchpad Live on BSC Network
» Token Listing
» Outreach Programs

Q-4 2023
» Website Launch V2.0
» Upcoming IDO Projects Listings
» Staking Deployment
» KOL program

Q-1 2024
» Native Farming
» Super Farming
» Marketplace
» Prepare Roadmap 2.0
